

# IDEAL ACC55

**2-in-1 combination device: Air cleaner & humidifier**  
combination for healthy indoor air

For room sizes of up to 55 m<sup>2</sup>

Humidification & air cleaning [2 in 1]

HEPA & activated carbon filter

Anti-bacterial evaporator cassette

Protection against microbiological growth

Perfume capsule for aroma therapy

Simple handling and cleaning

Low energy consumption

Quiet operation

Recommended for allergy sufferers

## Technical data

<b>Power supply</b>	230 V / 50 Hz
<b>Power consumption</b>	22 / 25 / 34 watts
<b>Humidification performance</b>	up to 250 g/h
<b>Noise level (dB)</b>	< 31 dB (A)
<b>Water tank capacity</b>	8 litres
<b>Dimensions (H x W x D)</b>	600 x 550 x 330 mm
<b>Weight</b>	9.3 kg

## Product description

The combination device guarantees a healthy room climate throughout the year and does not only ensure clean air by filtering the smallest particles from the air but also provides ideal air humidity (evaporator system) at the same time. The system combines a humidifier and an air cleaner in one device. With an evaporation and cleaning performance suitable for rooms up to 55 m<sup>2</sup>. A permanent prefilter stops hair, house dust and other major particles of dirt. The downstream HEPA fine particulate air filter filters almost all particles, pollen, bacteria and viruses. The activated carbon filter absorbs bad odours. And not least, the evaporation pad is in charge of air humidification. The evaporator cassette covered with an anti-microbial layer for self-regulating hygienic cold vaporisation prevents microbial growth. This prevents the growth of germs or mould in both the filter and the evaporator cassette. Operation display (blue LED). Simple filter change. Energy-efficient and extremely smooth-running motor. Super-silent operation - ideal for use in sleeping rooms and children's rooms. Convenient cord wrap. Perfume capsule for use with essential oils. Simple cleaning by removing the water tank. This device efficiently reduces the air pollution and provides a room climate in which in particular allergy sufferers can breathe easily.

# IDEAL ACC55

## Device features

### SELECTABLE DEVICE PERFORMANCE

The combination device runs on three performance levels for power operation, normal operation and quiet night operation.

### FLAVOURED INDOOR AIR

The perfume capsule allows to optionally flavour the air with essential oils. This creates additional wellness.

### CONVENIENT WATER SUPPLY

Transparent and removable water tanks with 8 litres of capacity. Ensure a long duration.

### ALMOST 100% CLEANLINESS

Two highly effective HEPA fine particulate air filters with a separation performance of 99.97% filter dusts and other allergens of sizes  $> 0.3 \mu\text{m}$  from the air (H13). Suitable for allergy sufferers.

### EFFECTIVE ODOUR ABSORPTION

The activated carbon odour filter reliably removes odours and chemical compounds over a long time.

### IDEAL WATER QUALITY

Due to the anti-bacterial effect of silver, the Ionic Silver Stick® ensures germ-free water quality within the device. Recommended as optional accessories.
